Education

University of South Carolina

Graduation Date: 06/2029

Columbia, SC

Bachelors of Science in Computer Science

Relevant Coursework

- **Algorithmic Design**
 - This course required students to design data structures and solve small problems using Java. I became a more effective programmer and problem solver in this course.
- **Computing in the Modern World**
 - This course requires students to become familiar with the professional computing world while also creating a professional portfolio website in HTML. This course familiarized me with HTML and Git.
- **AP Computer Science Principles**
 - I became more familiar with the basics of computer science such as binary data, data structures, programming techniques, and computer systems in this course while also becoming affluent in Python.

Skills

- **Programming Languages:**
 - Python
 - Java
 - HTML
- **Integrated Development Environments:**
 - Eclipse
 - Visual Studio Code
- **GitHub**
- **Microsoft Word**
- **Microsoft Excel**
